

How to  
Draw A  
labyrinth

Decorate your labyrinth  
as you wish!

Draw an equal armed cross  
and place dots where the  
corners would be if you  
drew a box around the cross.

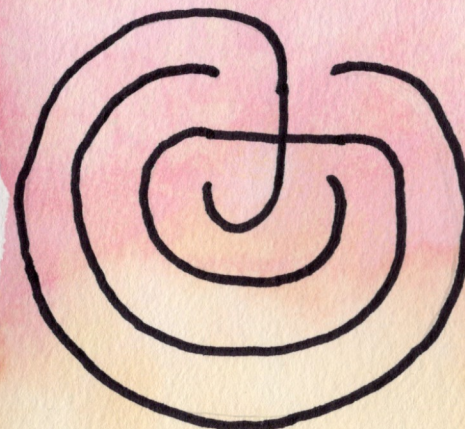

Unicursal (single path)  
labyrinths are beautiful and  
soothing to follow with the eye  
or a finger.

Here is how to make a very  
simple labyrinth that you can  
draw or paint on a surface of  
your choice and then "follow"  
as a decoration or meditation.

Leigh  
April 2020

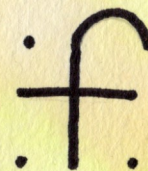

Draw a final curved line  
from the bottom arm of  
the cross, around all of the  
figure, to the bottom left  
hand dot. You're done!

Draw a third curved line  
from the left-hand arm of  
the cross, up and around,  
then down to the bottom  
right dot.

Draw a curved line from  
the top arm of the cross to  
the top right-hand dot.

You can reverse/mirror  
this step and the next 3  
steps if you are right-handed.

Draw another curved line  
from the right-hand arm  
of the cross around the top  
to the left-hand top dot.
